

# Personal Pain Relief

## TQ Solo Cordless Super Pulsed Laser

### Convenient

Light, portable, 18 hour rechargeable battery

### Drug-Free Pain Relief

Non-invasive, natural and safe

### Effective and More Versatile

15,000mW of power, synergizing 4 proven radiances

Super Pulsed Laser

**ORTHOCANADA**

# TQ Solo Cordless Super Pulsed Laser

A successful solution for your patients and your practice

Laser therapy is supported by 4000+ clinical studies

- In 10,000+ private practices
- In 30 countries
- F.D.A. cleared

Throughout the world, the portable TQ Solo is used to reduce acute/chronic pain, reduce stiffness and relieve arthritis and muscle spasm. It is an effective and convenient aid to your practice as a device you can use on patients or even rent to them.

## Natural technology

- Drug free
- Non-invasive
- Easy-to-use
- Side-effect free
- Gives pain free treatments

The TQ Solo has been designed with 3 specific light radiances built into a single cluster to utilize the most appropriate wavelength and light source selection to optimize outcomes. Since there are several factors that influence target tissue absorption of light, the best phototherapy devices need to incorporate multiple radiances into their construction.

Light radiances and wavelengths of the TQ Solo:

- Super pulsed infrared laser light: 905nm
- Pulsed broadband infrared light: 875nm
- Pulsed red light: 660nm

## Effective Relief:

- Muscle stiffness
- Muscle spasm
- Arthritis
- Pain
- More
