LaserLongevity™

TQ Solo Cordless Super Pulsed Laser

A successful solution for your patients and your practice

Laser therapy is supported by 4000+ clinical studies

- In 10,000+ private practices
- In 30 countries
- F.D.A. cleared

Throughout the world, the portable TQ Solo is used to reduce acute/chronic pain, reduce stiffness and relieve arthritis and muscle spasm. It is an effective and convenient aid to your practice as a device you can use on patients or even rent to them.

Multi Radiance Medical is an international corporation with a presence in over 30 countries. We have been serving customers for 20 years with leading edge therapeutic and competitiveness-enhancing laser technology.

Natural technology

- Drug free
- Non-invasive
- Easy-to-use
- Side-effect free
- Gives pain free treatments

The TQ Solo has been designed with 3 specific light radiances built into a single cluster to utilize the most appropriate wavelength and light source selection to optimize outcomes. Since there are several factors that influence target tissue absorption of light, the best phototherapy devices need to incorporate multiple radiances into their construction.

Light radiances and wavelengths of the TQ Solo:

- Super pulsed infrared laser light: 905nm
- Pulsed broadband infrared light: 875nm
- Pulsed red light: 660nm

Multi Radiance Medical is an international corporation with a presence in over 30 countries. We have been serving customers for 20 years with leading edge therapeutic and competitiveness-enhancing laser technology.

Effective Relief:

- Muscle stiffness
- Muscle spasm
- Arthritis
- Pain
- More
